

Food Waste is the single largest material sent to landfills

Torrington District Council are introducing a weekly food waste recycling service. In addition to the small kitchen caddy, the Council will also be delivering a larger food caddy to all households.

These larger food caddies have a lockable handle which ensures that they are seagull (and other vermin) proof, and will be collected weekly alongside your green box and green/brown bags.

From 4th June residents will no longer be able to place food waste in their green wheelie bins!
